SUMMERY

I am Thwahir, a self-taught passionate Full-Stack Developer specializing in Django and React. Instead of following the traditional college path, I chose to forge my own journey through self-learning. I am continuously honing my skills in Django, React, PostgreSQL, Git, and other modern technologies. Beyond coding, I believe in the power of effective communication and building meaningful connections. My journey isn't just about writing code—it's about crafting innovative solutions, delivering impactful results, and collaborating with others to grow in the dynamic tech world.

SKILLS

- **Programming Languages:** Python, Javascript
- **Web Technologies:** Django, Node.js, Express.js, Angular, RestAPI, React, Redux, Tailwind CSS, Bootstrap, CSS, HTML
- **Database:** PostgreSQL, MongoDB, Firebase
- **Cloud Technologies:** AWS, EC2, Cloudinary
- **Familiar with:** DSA, NGINX, Git, GitHub, Postman, Figma, Wordpress

PROJECTS

• Jasmedia: Marketing Agency Portfolio

Tools: MERN Stack, Tailwind, MagicUI, Cloudinary

Frontend:  Backend:  Live (User):  Live (Admin): 

◦ Jasmedia is a marketing agency portfolio website developed collaboratively as a team project, featuring both User and Admin panels.

◦ **User Panel:**

* Users can browse agency services, explore portfolio categories, and read client feedback.

◦ **Admin Panel:**

* Provides full content management with options to add, edit, block/unblock, delete, filter, and search.

* Portfolios are organized under categories and dynamically displayed on the frontend.

* Supports role-based access: Root Admin (full permissions) and Local Admin (limited edit access).

* Demo Credentials (Admin Login):

· **Root Admin:** rootadmin@gmail.com | Root@989

· **Local Admin:** localadmin@gmail.com | Loc@9895

• Mobilearc: E-Commerce for Mobile Devices

Tools: Django, HTML, Bootstrap, PostgreSQL, Razorpay

◦ The project is an e-commerce platform for mobile devices, built using Django and the MVT architecture. It features separate User and Admin panels for seamless management and interaction.

◦ **User Panel:**

* Users can register, log in, and manage their profiles, including updating details such as username, password, profile picture, and wallet balance.

* Browsing and searching for products with filters (category, brand, price, color).

* View individual product details and latest offers through banners.

* Adding products to the cart and applying coupon discounts.

* Payment options include online payments, cash-on-delivery (COD), and wallet usage (with refunds credited to the wallet).

* Viewing order history for better tracking.

◦ **Admin Panel:**

* Admins can efficiently manage the platform with features like managing users, including blocking/unblocking accounts.

* Admins can add, update, and manage categories, brands, products, and banners.

* Admins can view and control order details, including updating order status to ensure smooth operations.

• Netflix Clone: (Mini Project)

Tools: React, Tailwind CSS, Firebase

◦ The project is Netflix clone built using React, integrated with the TMDB API for dynamic movie and TV show listings.

- * User registration and login functionality
- * Users can add movies to their favorite list

- **OLX Clone: (Mini Project)**

- Tools: *React, Tailwind CSS, Firebase*
- The project is OLX Clone build using React, Firebase, integrated with the FakeStore API for dynamic Product listings.
 - * Implemented Google Login for secure user authentication using Firebase.
 - * Dynamically fetch and display product data from the FakeStore API.
 - * Enabled users to browse products and view detailed information for each item.

EXPERIENCE

- **Brototype** 

- Django full-stack developer Trainee* 2024-Present
Kochi, Kerala
- At Brototype, I am undergoing a rigorous self-learning course in Full Stack Development, simulating an IT company environment. The course is structured around weekly tasks that I complete independently, followed by interview-style review sessions. I have worked on 2 main projects and 2 mini-projects, gaining practical experience with Django, React, and other web technologies. This experience has helped me develop both technical skills and interpersonal communication abilities.
